

Product Information

Specifications

Californium-252

Half-Life/Daughter	2.645 years to curium-248
Decay	Decay Radiation Information (NNDC)
Chemical Form	Solution or custom form
Radionuclide Purity	>60–80% by atom Cf-252
Production Route	Successive neutron captures and beta decays of curium isotopes
Processing	Radiochemical processing
Primary Container	Dried solution in glass V-vial
Availability	Stock
Unit of Sale	Micrograms

Other Information
